

**WET2013 Technical Program Time Table**

Session	Speaker	Title	Page
<b>Saturday, June 15, Session 1A (15-1A)</b>			
<b>(Oral introduction: 13:20-14:30, Poster viewing: 14:30-15:30) Chair: FUKUSHI Kensuke</b>			
15-1A-01	KISHIMOTO, Naoyuki	Effect of active control of air-cathode pH on performance of a microbial fuel cell	1
15-1A-02	ERYURUK, Kagan	Reduction of hydraulic conductivities of glass beads using <i>Sporosarcina pasteurii</i>	1
15-1A-03	BANDARA, Wasala M. K. R. T. W.	Stability of UASB reactor performance during overloaded conditions by degasification	2
15-1A-04	TAKABE, Yugo	Effects of crush process on methane conversion efficiency in thermophilic anaerobic digestion with coffee grounds	2
15-1A-05	PARK, Darang	UASB-MBR as a tool for decentralized sanitation and reuse (DESAR): Nutrients and organic removal and energy recovery	3
15-1A-06	AKHMAD, Rivai	Bio-hydrogen Production of Sago-Starch by Thermophilic Bacteria: The Effect of C/N Ratio and Trace Metal Concentration	3
15-1A-07	PHUMMALA, Kanthima	Development of thermophilic hydrogen producing microbial consortia from hot springs using mixed of hexose and pentose sugars as the substrates	4
15-1A-08	ACHARYA, Shwetha	Enhancing stability of mesophilic anaerobic digestion using volatile fatty acid degrading culture as inoculum	4
15-1A-09	TADA, Chika	Experience tourism, "enotourism", producing biomass energy using food garbage at a hot-springs resort	5
15-1A-10	TAKADA, Kazuki	Characterization of Microbial Community in Membrane Bioreactors Treating Domestic Wastewater	5
15-1A-11	MAHARJAN, Namita	An integrated system of Sedimentation-DHS-A2SBR for effective removal of organic matter and nutrients from municipal wastewater	6
15-1A-12	SUENAGA, Toshikazu	Reduction of excess activated sludge by a high-pressure-flow device (DEM) and the transition of microbial community: Pilot-scale demonstration	6
15-1A-13	SEKINE, Makoto	Feasibility of simple bioassay to detect the formation of toxic biodegradation products during activated sludge process	7
15-1A-14	NITTAMI, Tadashi	Influence of surface hydrophilicity on polytetrafluoroethylene membrane fouling in a submerged membrane bioreactor using two activated sludges with different characteristics	7
15-1A-15	HASAN, Md. Mahmudul	Operational Factors in Membrane Bioreactor Using a Simple Ceramic Filter	8
15-1A-16	SHAHATA, Ahmad Mohammedadel	Removal of color from molasses wastewater using membrane bioreactor with extremely acidic condition	8
15-1A-17	XUE, Wenchao	Modeling Simulation of Forward Osmosis Plate Membrane Modules for Concentrating Nutrients	9
<b>Saturday, June 15, Session 1B (15-1B)</b>			
<b>(Oral introduction: 13:20-14:30, Poster viewing: 14:30-15:30) Chair: SEI Kazunari</b>			
15-1B-01	INO, Daisuke	Removal of arsenic from Indian groundwater by using TiO <sub>2</sub> photocatalyst: Effects of inorganic ions on kinetics of As(III) oxidation	10
15-1B-02	MIHO, Saori	Simultaneous measuring method for PRTR chemicals in water environment by using GC/MS and LC/MS/MS	10
15-1B-03	KATO, Fumitaka	Comparison of fluorescence spectroscopy and ultraviolet absorbance applied to COD continuous monitoring in industrial wastewater	11
15-1B-04	KONGVICHEN, Lucksga	Development of a hybrid process (adsorption and hydrocyclone) for the treatment of humic acid presence in liquid phase	11
15-1B-05	MIURA, Osuke	Water clarification and resource recovery by high gradient magnetic separation with magnetic adsorbents	12
15-1B-06	HATA, Motohide	Preparation of Mesoporous Activated Carbon from Bamboo by Phosphoric Acid Activation and Utilization for Large Molecule Adsorption in Aqueous Solution	12
15-1B-07	IWASAKI, Daichi	Phosphorus Release from the Sediments of Drainage Canals in Paddy-Field Districts around Lake Biwa	13
15-1B-08	IIDA, Tatsuya	Surface Modification of Activated Carbon for Enhancement of Nitrate Ion Adsorption Capacity	13
15-1B-09	KONDO, Takashi	Addressing matrix effects in analysis for pesticides and their transformation products using a LC-positive-electrospray-MS/MS	14
15-1B-10	OHNO, Masaki	Catalytic-photochemical decomposition of perfluorooctanoic acid (PFOA) with chelate iron	14
15-1B-11	TOSA, Koji	Reactivity of terpineol, carvacrol, thymol and hinokitiol with aqueous chlorine	15
15-1B-12	KONUMA, Susumu	Combined strategy to assess the quality of the aquatic environment using <i>Heterocypris incongruens</i> and modified <i>Daphnia magna</i> toxicity tests with growth rate analysis	15
15-1B-13	HEN Shu-Ping	Application of diffusive gradient in thin films (DGT) and a chemical equilibrium model for assessing bioavailability levels of trace metal in effluent-affected rivers	16
15-1B-14	IMOTO, Yuuji	Application of Two-stage Coagulation for High Turbidity Raw water	16
15-1B-15	LIN, Fengyu	Effects of Sand-alternative on the Surrounding Marine Sediment	17
15-1B-16	NAHAR, Mst. Shamsun	Recovery of Soft Metals Isotopes (208Pb and 111Cd) in Trace Level Using Multifunctional Biosorbent	17
15-1B-17	TSUSHIMA, Kotaro	Measurement of the groundwater velocity using paper disc with dye ink	18

**WET2013 Technical Program Time Table**

Session	Speaker	Title	Page
<b>Saturday, June 15, Session 2A (15-2A)</b>			
		<b>(Oral introduction: 15:40-16:50, Poster viewing: 16:50-17:50)</b>	<b>Chair: IMAI Tsuyoshi</b>
15-2A-01	TOKUMURA, Masahiro	Estimation of pharmaceutical removal in a sewage treatment plant -Model simulation based on laboratory test data-	19
15-2A-02	MASUMOTO, Hiroki	Benzene and toluene biodegradation potential in methanogenic cultures established by feeding benzene, toluene and their mixture	19
15-2A-03	SUZUKI, Kenshi	Population dynamics and bacterial interaction in a model phenol-degrading bioreactor	20
15-2A-04	ZHANG, Hui	Estrogens and xenoestrogens in livestock fresh excreta and manure treatment facilities in Shanghai and Zhejiang Province, China	20
15-2A-05	LI, Yan	Sustainable biodegradation of bisphenol A by <i>Spirodela polyrrhiza</i> and <i>Novosphingobium</i> sp. strain FID3 association	21
15-2A-06	KURNIATI, Evi	Heavy Metal Tolerance of <i>Aspergillus flavus</i> Strain KRP1 Isolated from Forest Soil	21
15-2A-07	YAMAMOTO, Mitsuo	Effect of Dissolved Iron on the Growth of a Brown Alga, <i>Eisenia bicyclis</i>	22
15-2A-08	TAKEDA, Fumihiko	Effect of <i>Potamogeton pusillus</i> on water quality and plankton community	22
15-2A-09	TOYAMA, Tadashi	Plant Growth-Promoting Rhizobacterium, <i>Sinorhizobium</i> sp. SP4, Enhances Biomass Growth, Nutrient Uptake and Starch Production of Giant Duckweed ( <i>Spirodela polyrrhiza</i> )	23
15-2A-10	CO, Thi Kinh	Removal of nitrogen in fish processing wastewater in the Mekong Delta, Vietnam, by using the biological attached growth treatment	23
15-2A-11	EBIE, Yoshitaka	Development of Emissions Factor for the Decentralized Domestic Wastewater Treatment for the National Greenhouse Gas Inventory	24
15-2A-12	SONG, Kang	Phylogeny and abundance of bacteria responsible for nitrous oxide reduction from activated sludge systems	24
15-2A-13	INOUE, Daisuke	Polyhydroxyalkanoate-producing potential of cultivable bacteria in a lab-scale activated sludge reactor	25
15-2A-14	SHIMA, Kagura	Development of a low cost wastewater treatment system by Slanted-Chamber Method	25
15-2A-15	NAKANO, Kazunori	First 3 Years of Performance in Planted and Unplanted Five-stage Vertical Flow Constructed Wetland Treating Milking Parlor Wastewater	26
15-2A-16	KUBOTA, Keiichi	Process performance of two-staged Microbial Fuel Cells during continuous treatment of molasses-based wastewater	26
15-2A-17	LE, Tuan van	Potential application of cyclone microbubbles in the treatment of palm oil mill effluent under batch and continuous operations	27
<b>Saturday, June 15, Session 2B (15-2B)</b>			
		<b>(Oral introduction: 15:40-16:50, Poster viewing: 16:50-17:50)</b>	<b>Chair: NAKAI Satoshi</b>
15-2B-01	SHARMA, Biraj Bikash	Effects of Water Borne Iron on Toxicity and Pathophysiology of Indian Major Carp - A Review	28
15-2B-02	RAHMAN, Ari	Heavy Metal Investigation of Brick Based Textile Sludge by Toxicity Characteristic Leaching Procedure	28
15-2B-03	KONUMA, Kazumoto	Pesticide transformation products in environmental waters: comparison between paddy field and drinking water source	29
15-2B-04	NAKAJIMA, Tsunenori	Effect of the presence of chelators on the uptake and toxicity of mercury and other metals to <i>Daphnia magna</i>	29
15-2B-05	SAGA, Kaname	Removal of heavy metal in aqueous solution using zero-valent iron	30
15-2B-06	CHENSUN, Shimeng	Adsorption of Pb(II) from Aqueous Solution on Activated Carbon Fibers	30
15-2B-07	CHEN, Xiaochen	Adsorption of Ammonium by Soil in the Presence of Phosphate during Land-treatment Process of Nutrient-enriched Wastewater	31
15-2B-08	TAKEUCHI, Kotaku	Optimal Oxidation of Activated Carbon by Nitric Acid and Ammonium Persulfate for Removal of Cd(II) Ion	31
15-2B-09	TAKANASHI, Hirokazu	A screening study of mutagen formation potential (MFP) of pesticide transformation products in water environments (PTPWs) to investigate the MFP changes from their parent pesticides through transformations	32
15-2B-10	LIN, Bin Le	AIST-MeRAM: an easy-to-use tool for aquatic environmental risk assessment and management of chemicals	32
15-2B-11	ISLAM, Md Saiful	Bioavailability and risk assessment of trace metals in sediment and fish species of some rivers in Bangladesh	33
15-2B-12	TABUCANON, Allan Sriratana	Prediction of Flood Characteristics in the Future under Climate Change scenarios in Hat Yai Municipality, Thailand	33
15-2B-13	HARIBOWO, Riyanto	Determination of unit loading ratio of toxicity in river water using concentrated water samples and toxicity tests by Medaka fish ( <i>oryzias latipes</i> )	34
15-2B-14	KISUI, Takeshi	Whole effluent toxicity assessment of 8 industrial effluents in Toyama Prefecture with battery of short-term chronic assay	34
15-2B-15	MATSUYAMA, Saki	Effect of Agricultural By-Products on Nitrate Attenuation in Porous Media	35
15-2B-16	KAMEYA, Takashi	Nitrogen purge condition for simultaneous GC/MS measurement of chemicals	35
15-2B-17	OH, JungKeun	Behaviors of HBCD and its lower brominated derivatives in aquatic environment	36

**WET2013 Technical Program Time Table**

Session	Speaker	Title	Page
<b>Sunday, June 16, Session 3A (16-3A)</b>			
<b>(Oral introduction: 09:00-09:55, Poster viewing: 09:55-10:55) Chair: NISHIMURA Fumitake</b>			
16-3A-01	TAKEUCHI, Ayano	Comparison of conventional alga growth inhibition test and a new rapid algal bioassay using delayed fluorescence on whole effluent	37
16-3A-02	AMANO, Yoshimasa	Role of Nitrogen Reduction Accompanying Dilution for Disappearance of Cyanobacterial Bloom in Eutrophic Lake	37
16-3A-03	SUGIMOTO, Koichi	Buoyancy Regulation of Microcystis aeruginosa in Different Nutrient Conditions	38
16-3A-04	SEGAWA, Nami	Continuous oxidation of arsenite by arsenite-oxidizing bacteria using a DHS reactor	38
16-3A-05	SUGIMOTO, Iwao	Application of leguminous plants to removal of arsenic from groundwater	39
16-3A-06	NAGAI, Taichi	Effects of Chelated Iron on the Growth of Sargassum species at the Germling and Immature stages	39
16-3A-07	SHRESTHA, Sadhana	Estimating health risk from enteropathogenic microorganisms in shallow groundwater of Kathmandu Valley, Nepal	40
16-3A-08	VO, Huy Thanh	Disinfection using pressurized carbon dioxide microbubbles to inactivate Escherichia coli, bacteriophage MS2 and T4	40
16-3A-09	CHUTIVISUT, Pokchat	Denitrification and dissimilatory nitrate reduction to ammonium (DNRA) activities in freshwater sludge from Nile tilapia aquaculture system	41
16-3A-10	KAMEI, Tatsuru	Enhanced heterotrophic denitrification by ANAMMOX activity in cultivated sludge	41
16-3A-11	MATSUMOTO, Yuusuke	Metabolomics analysis of benzoate degradation in Pseudomonas putida NBRC14671	42
16-3A-12	SUWANNASING, Waranya	Study of polyhydroxyalkanoates (PHAs) production from agro-industrial waste by Bacillus sp. SV13	42
16-3A-13	TSUSHIMA, Ikuo	Nitrous Oxide Emitted from Wastewater Treatment Processes and River Water	43
16-3A-14	KATSUMATA, Masahiro	Exhaustive identification of Norovirus by using pyrosequencing method	43
<b>Sunday, June 16, Session 3B (16-3B)</b>			
<b>(Oral introduction: 09:00-09:55, Poster viewing: 09:55-10:55) Chair: TAKANASHI Hirokazu</b>			
16-3B-01	KHAJURIA, Anupm	Water resource management: Challenge to water reclamation and reuse	44
16-3B-02	TAGAMI, Keiko	Concentrations of 57 Elements in Major Rivers in Japan	44
16-3B-03	TAGAMI, Keiko	Isotope Ratio and Concentration of Water Soluble Carbon in 45 Major Rivers in Japan and their Correlations with Major Elements	45
16-3B-04	NAGAI, Tomohisa	Characteristics of Decomposition of Nitrogen and Carbon in the Sediments in Agricultural Drainage Canals	45
16-3B-05	TAKEDA, Tomoko	Knowledge-building for water professionals using international web-conference systems	46
16-3B-06	AKTAR, Kazi Shamima	Stakeholders Point of Views about Water Use and Pollution Issue in Dhaka Bangladesh	46
16-3B-07	AGATSUMA, Saki	Water Quality Purification in the Seaside Park Pond using Shell Fragment as Regional Unused Resources	47
16-3B-08	TRAN, Anh Thuy	Assessing the impacts of land cover changes and gate control on urban river water quality Case study: Re river, Haiphong City, Vietnam	47
16-3B-09	MURAMATSU, Kazuo	The evaluation of L-Q equation in rain events	48
16-3B-10	SAGEHASHI, Masaki	A Survey of the Water Use and Countermeasures for the Emergency Water Supply at Care Facilities for Elderly in Tokyo	48
16-3B-11	YOSHIOKA, Tasuku	Evaluation of seasonal water quality fluctuation and countermeasures against CSO in Edo Castle Outer Moat	49
16-3B-12	SEIYA, Maki	Decision-Making Oriented Multi-Objective Optimization for Constructing Basin-Scale Water Use System -A Case Study of Arakawa Basin-	49
16-3B-13	SATA, Mika	Risk factors and water usage among children in Hue Province, Vietnam	50
16-3B-14	HASHIMOTO, Tsubasa	Countermeasure against Increase of Heavy Rain in the Future	50

**WET2013 Technical Program Time Table**

Session	Speaker	Title	Page
<b>Sunday, June 16, Session 4A (16-4A)</b>			
<b>(Oral introduction: 11:05-12:10, Poster viewing: 12:10-13:05) Chair: KAMEYA Takashi</b>			
16-4A-01	PITAKTEERATHAM, Niti	High Efficiency Removal of Phosphate from Groundwater by Zirconium Sulfate-Surfactant Micelle Mesostructure Immobilized on Polymer Matrix	51
16-4A-02	MYANDAS, Narankhuu	Impact of trace elements on the efficiency and microbial community structure in enhanced biological phosphorus removal process	51
16-4A-03	MATSUMOTO, Shinya	Applicability of a sequencing batch membrane biofilm reactor for simultaneous nitrogen and phosphorus removal from low C/N ratio wastewater	52
16-4A-04	KUDO, Yuto	Characterization of kinetic parameters for nitrifying activity and nitrifying-microbial ecosystem in the sediment of brackish lake Sanaru	52
16-4A-05	USHIJIMA, Masahiro	Evaluation of antimicrobial resistance of Salmonella spp. isolated from Yae River, Kyushu Island, Japan	53
16-4A-06	KIM, Sengyun	Characterization of ammonia-oxidizing enrichment culture originated from granular activated carbon unit in drinking water treatment plant	53
16-4A-07	HONDA, Ryo	Removal of fecal indicator bacteria and viruses in water reuse for agriculture by aerated lagoon in Burirum Municipality, Thailand	54
16-4A-08	AMARASIRI, Mohan	Microfiltration of human noroviruses: Effects of the presence of human enteric bacteria on virus rejection	54
16-4A-09	NISHIYAMA, Masateru	Monitoring of antibiotic resistant Enterococci isolated from sewage and river water	55
16-4A-10	ABEYDAYAKA, Amila	Low temperature enzymatic degradation of bacteriophage Qb RNA and partially chlorinated bacteriophage Qb	55
16-4A-11	INABA, Manami	Detection of F-specific RNA bacteriophage and somatic coliphage from grey water	56
16-4A-12	FURUKAWA, Takashi	Abundance of vancomycin-resistant-enterococci (VRE) in water environments	56
16-4A-13	SAITO, Toshiaki	Nitrous oxide production potentials of Poly-phosphate Accumulating Organisms cultivated with acetate and peptone	57
16-4A-14	SHIMAUCHI, Hidetaka	Time course change of the gene patterns of indicator bacteria for fecal pollution in river water	57
<b>Sunday, June 16, Session 4B (16-4B)</b>			
<b>(Oral introduction: 11:05-12:10, Poster viewing: 12:10-13:05) Chair: NAKAJIMA Fumiyouki</b>			
16-4B-01	SANTASNACHOK, Chawikarn	Utilization of rice husk ash as adsorbent for methylene blue in water	58
16-4B-02	NISHIMURA, Fumitake	Characteristics of POPs distribution in the Lake Biwa-Yodo River System	58
16-4B-03	YAMAMOTO, Koichi	Effect of Development of Peat Swamp Forest on Nutrients Concentrations in Central Kalimantan, Indonesia	59
16-4B-04	ARAO, Yasuhiro	History investigation of the sediment in Hitotuse Dam Reservoir by mineral analysis	59
16-4B-05	LE QuynhNga	Effect of Concentration and Size of Inorganic Suspended Sediment on Nitrogen Dynamics in Freshwater	60
16-4B-06	SUIF, Zuliziana	Seasonal Variations of Soil Erosion and Suspended Sediment Load in The Lower Mekong River Basin	60
16-4B-07	MURAKAMI, Kazuhito	Integrated Environmental Impact Risk Assessment System (iEIRAS) for Influence of Herbicide on Microcosm System	61
16-4B-08	LAM, Lauho	Evaluation of the environmental impacts of source-separation systems for domestic wastewater management modeled on rural villages in Tianjin, China.	61
16-4B-09	LEE, Sangjung	Water Quality Impact of a Municipal Wastewater Treatment Plant Damaged by Flooding Disaster on the Gyeongang-river, Korea	62
16-4B-10		Canceled	62
16-4B-11	BHANDARY, Netra Prakash	An Experimental Study on the Influence of Changes in Groundwater Environment on Landslide Movement	63
16-4B-12	YAMAMOTO, Yuko	Relationship between the Groundwater Quality and Aridification in Sarobetsu Mire	63
16-4B-13	HAMA, Takahide	The effect of bioturbation by tubificid worms on nutrient release from the sediment in an agricultural drainage canal	64
16-4B-14	WANG, Wenjing	Synthesis of Zeolites from Lake Sludge as Ammonium Adsorbent Materials	64
16-4B-15		Canceled	65
